

**About Us:** i-80 Gold Corp is a well-financed gold producer and developer holding an impressive portfolio of advanced-stage gold projects in the State of Nevada. The Company's primary goal is to build a self-sustaining, multi-asset, mining company with a peer-best growth platform by employing a methodical, capital disciplined and staged approach to minimize risk while also assessing and monitoring for accretive growth opportunities. For more information about i-80 Gold please visit our website: [www.i80gold.com](http://www.i80gold.com).

**Who are we?**

- We are genuine, engaged, and dedicated to achieving goals in a safe, strategic, and sustainable manner.
- We overcome obstacles, follow-through on our commitments, take pride in our work, and live our culture.
- We are professionals who believe in growth, inclusion, and diversity.
- We promote teamwork and open communications to inspire all stakeholders.

**Position: Senior Underground Geologist**

The Senior Underground Geologist will bring a strong production, ore and grade control, and reconciliation background to our team's exciting growth plans, including an aggressive underground and surface exploration program to delineate and expand underground mineral resources and build production. This role supports a proactive safety culture through active engagement in safety initiatives and interactions. The successful candidate will be responsible for leading and training mine geologists in core logging, sampling, mapping, ore and grade control, lead underground drill programs, and work closely with exploration, engineering, operations, administration, other technical staff, and management to develop and update weekly, monthly, 3-month rolling, annual, and life of mine plans. There will be a deliberate focus on growing inventory through defining and testing robust exploration targets in the near-mine environment. The Senior Underground Mine Geologist will align with the organization's long-term strategy for its projects and mines while adhering to industry regulations and company health, safety, and environmental standards.

**Location:** 5190 Neil Road, Suite 110, Reno, NV 89502 (with occasional travel to site locations)

---

**Responsibilities:**

- Ensure all safety procedures and regulatory guidelines are always followed
- Active leadership and participation in safety meetings, interactions and inspections
- Leading, training, and doing underground sampling, mapping, ore and grade control, core logging, planning, reconciliation, and reporting
- Ensure that geological, geotechnical, and defined metallurgical information is collected or sampled from diamond drill, reverse circulation, and other methods of drilling and sampling
- Guide underground supervisors and miners regarding the delineation of ore and waste
- Gather and analyze geology and assay data using database and modeling software
- Develop processes to calculate development and stope tons and grades
- Be a proactive member of the technical and operations team
- Other duties as assigned to support Granite Creek and i-80 Gold Corp

**Qualifications:**

- Bachelor of Science Degree in Geology, Geological Engineering, or a related field
- 7 years of demonstrated progressive experience in underground mine geology
- Experience in underground, Carlin-style deposits preferred
- Demonstrated knowledge of metal-non-metal underground mining regulations as pertaining to typical mine geology tasks
- Good understanding of drilling techniques, mineralized systems, rock alteration, geologic, and structural mapping
- Basic understanding of underground mine operations and metallurgical modeling needs

- Experienced user of Microsoft Office products and user of Vulcan or similar modeling software for geologic modeling
- Good verbal, written, and listening communications skills and comfortable doing so with both internal and external stakeholders
- Authorized to work in the United States
