#### Who are we?

- We are genuine, engaged, and dedicated to achieving goals in a safe, strategic, and sustainable manner.
- We overcome obstacles, follow-through on our commitments, take pride in our work, and live our culture.
- We are professionals who believe in growth, inclusion, and diversity.
- We promote teamwork and open communications to inspire all stakeholders.

#### Position: Senior Metallurgist

i-80 Gold Corp is seeking a candidate to fill the position of Senior Metallurgist. The Metallurgist will manage work programs by consultants and metallurgical laboratories in support of company projects, operations, and due diligence activities. They will provide expertise for safe, environmentally responsible production, processing plant and heap leach improvements, metal balance, problem solving, cost reductions, and efficiency improvements in company processing facilities. The incumbent will recommend and introduce beneficial economic and metallurgical practices.

**Location:** 5190 Neil Road, Suite 110, Reno, NV 89502 (with occasional travel to site locations)

---

#### Responsibilities

- Manage work programs by consultants and metallurgical laboratories in support of company projects, operations, and due diligence activities
- Provide expertise in support of safe, environmentally responsible production, processing plant and heap leach improvements, metal balance, operations, maintenance, ore control and reconciliation, and company metallurgical/assay labs
- Lead metallurgical and process improvement projects as part of project teams that manage engineering, capital justifications, construction, and commissioning
- Create the plans and direct metallurgical testing in internal labs to support operating activities
- Support the implementation and use of process control systems and advanced applications
- Lead and support budgeting, forecasting, and metal accounting
- Support all regulatory reporting requirements
- Liaise frequently with Geology, Engineering, and Mine/Process Operations to ensure objectives are achieved

#### Qualifications

- Bachelor of Science degree in Metallurgical Engineering, Chemical Engineering, or similar
- 7 years of experience in gold processing facilities for refractory and oxide ores
- Exposure to heap leach processing
- Experience with process control applications
- Demonstrated ability to analyze metallurgical information and recommend actions to resolve operations, environmental, and compliance issues as well as to optimize process designs
- Proficiency in Microsoft software applications and network platforms
- Excellent verbal and written communications skills
- Demonstrated ability to listen
- Ability to travel for business purposes, primarily in Nevada
