

About Us: i-80 Gold Corp is a well-financed gold producer and developer holding an impressive portfolio of advanced-stage gold projects in the State of Nevada. The Company's primary goal is to build a self-sustaining, multi-asset, mining company with a peer-best growth platform by employing a methodical, capital disciplined and staged approach to minimize risk while also assessing and monitoring for accretive growth opportunities. For more information about i-80 Gold please visit our website: www.i80gold.com.

Who are we?

- We are genuine, engaged, and dedicated to achieving goals in a safe, strategic, and sustainable manner.
- We overcome obstacles, follow-through on our commitments, take pride in our work, and live our culture.
- We are professionals who believe in growth, inclusion, and diversity.
- We promote teamwork and open communications to inspire all stakeholders.

Position: Process Supervisor

i-80 Gold Corp is seeking a motivated and proactive individual to fill the position of **Process Supervisor** for our Lone Tree site. This person selected for the position will be responsible for process operations and maintenance, on a daily basis, as well as other duties and small project oversight that may arise through the normal course of business.

Site: Lone Tree

i-80 recently acquired a 100% interest in the Lone Tree property, located within the Battle Mountain Trend, from Nevada Gold Mines LLC. Lone Tree is a past-producing mine with historic production of approximately 4.2 million ounces of gold and ongoing production from existing heap leach pad and CIC circuit. The site also hosts substantial processing infrastructure including a whole-ore autoclave, and a floatation circuit currently being evaluated for refurbishment. It is expected that the Lone Tree Complex will become the hub of i-80's Nevada operations and provides the Company with a genuine opportunity to become a stand-alone producer with facilities capable of processing several ore types.

Responsibilities:

- Demonstrate a personal commitment to safety
- Coordinate leach pad and CIC operators to maximize gold recovery from existing leach pad
- Seek to minimize costs through process improvements
- Supervise and lead safety, environmental, security, community, MSHA and other regulatory requirements for the Lone Tree operation, supported by i-80 and external subject matter experts
- Development of our people and helping them to earn opportunities
- Ensure standards are established, communicated, and maintained through training, observation, coaching and accountability.
- Maintain transparent communications to all levels of the organization
- Supervise site employees and ensure that contractors, consultants, and all other visitors are oriented and can work safely and efficiently
- Know and understand how this role supports safety, environmental, production, and financial targets. Ensure that targets set for self and team are met.
- Actively pursue improvement in every aspect of our business.

Qualifications

- High School Diploma or GED
- Demonstrated success in 8+ years gold processing experience, including a minimum of 3+ years in process operations direct supervisory and leadership roles
- Experienced in supervising operation and maintenance of heap leach, CIC, and solution pumping systems. Autoclave experience is a plus.

- Must have worked with regulatory and other government entities for mining (e.g., MSHA, BLM, NDEP, County, City/Town, etc.)
- Ideal candidate will be interested in growing their career with a junior mining company focused in growing by exploring, developing projects, and operating mines
- Competent in the use of Microsoft Office software, particularly Excel, Word, and PowerPoint
- Experienced with large scale mine water management systems

How to Apply:

Please refer to the Careers page on our website for instructions on how to apply. We thank you for your interest. Only those selected for an interview will be contacted.
