

# Driving the Future

**i-80**  
GOLD CORP

## 2022 SUSTAINABILITY REPORT

i-80 Gold is the Nevada-focused exploration, mine development, and production company. We are committed to economic, social, and environmental sustainability in the Silver State.

# For Us, it's Personal

## Sustainability is built into i-80 Gold's mission and values

With the creation of i-80 Gold in 2021, we launched our comprehensive plan to make a truly Nevada-focused gold mining company. This ambitious plan commits to investing and growing in the state. It also made me wonder: what does it mean for this company to be Nevada-focused? After all, our operations are in Nevada, so of course we are focused on it. Though I'd like to think we meant something far bigger than that.

To be Nevada-focused is bigger than focusing on a portfolio of assets that just happen to be in the same jurisdiction. It means focusing on Nevada itself – the people, the lands, the mines, the air, the communities, the towns, the wildlife – the things that make the state unique, and with that focus, we want to do it right.

For this team, because we are Nevadan, the desire to do right by the Silver State is a personal one.

In this report, our first of its kind, we will review i-80 Gold's year in sustainability. This is a snapshot in time to capture our commitments to environmental stewardship and the work we are doing to sustain the environment for Nevada's generations to come. It's a picture of our economic health and our investment to sustain the local economies and partners that enable our good work. Perhaps most critically, this report will emphasize our commitment to people, both our host communities and the i-80 Gold team, and how our leadership will sustain both.

For us, it's personal.

A handwritten signature in black ink, appearing to read "Allison Anderson".

Community & Government  
Relations Manager

# Contents

## 01 Uniquely Nevadan

Pages 2 – 7

Introducing the i-80 gold team, projects, and our plans for the future.

## 02 Beyond Stewardship

Pages 8 – 11

i-80 Gold is committed to minimizing our environmental footprint.

## 03 Partnering for Success

Pages 12 – 14

Working cooperatively with communities and stakeholders to provide a positive local impact and great economic benefit.

## 04 Empowering People

Pages 15 – 21

The i-80 Gold team is our most precious resource, and it is our pledge to create a safe and inclusive workplace.

### About This Report

This report addresses our approach to Environmental, Social, and Governance (ESG) issues and helps us create sustainability goals for the future. These include corporate social responsibility, environmental stewardship, responsible governance, and long-term financial success.

Reporting Period: September 1, 2021 – September 30, 2022

Report Cycle: Issued annually

Report Boundaries: Company-wide operations for i-80 Gold

# Uniquely Nevadan

Hello friends,

I am excited to welcome you to i-80 Gold's inaugural sustainability report. As you will see in the coming pages, i-80 is a company that focuses on sustainability in its operations, its interface with the environment, and our team. For us, sustainability isn't just a commitment or a responsibility, but a challenge that excites and inspires us. Hopefully this report will demonstrate that excitement, and you will share our enthusiasm.

Our environmental record is one Nevadans can be proud of. At i-80, we take the covenant between our operations and the natural resources under our care very seriously. Due to their size, our young operations emit only a fraction of the emissions compared to those of a major operating mine. This creates an opportunity for us to monitor these emissions as our footprint grows, and engineer solutions to ensure we meet and exceed the standards set forth in law and regulation.

We are proud to report there have been no major environmental incidents at any of our sites for this reporting period, or since we acquired them.

None of this could happen without our team. In the last year, i-80 has been able to attract top talent from across Nevada's competitive mining industry. This includes long-term veterans of the mining industry and top talent from our support industries. It also means developing new talent and creating our i-80 "3 Ships" Internship Program to attract top students from Nevada's universities, and help start careers the i-80 way.

Since this time last year, i-80 has grown from 40 employees to 128, an increase of over 300 percent. As with any mining company, our priority has to focus on how to keep all these people safe. This great team has gone through more than 3,400 hours of safety training. We add to this figure daily to ensure our team can quickly identify, avoid, and prevent hazards across the site. We will continue to reinforce these values across our organization as we grow.

I'm proud of this company, we're proud to be in Nevada, and that pride will continue to shine through as we grow.

A handwritten signature in black ink, appearing to read 'Matt Gili'.

**Matt Gili**

**President & Chief  
Operating Officer**

# Skilled Governance

The board and management teams bring extensive technical, financial, legal, ESG, and entrepreneurial expertise with proven track records of aligning their interests with shareholders and creating value.

**Ewan Downie**

An accomplished company builder who has participated in several gold and base metal discoveries.

**Ron Clayton**

More than 40 years of proven leadership in the mining industry.

**Eva Bellissimo**

A global, industry-renown legal and financial strategist.

**John Begeman**

Engineering and mining leader with a history of executive leadership.

**John Seaman**

A corporate finance exec. with deep mining roots and a director and CEO at several successful companies.

**Greg Smith**

An entrepreneur and mining executive with a successful track record in the natural resources industry.

**Arthur Einav**

Renown legal and business expert with experience in the U.S. and Canada.

# The Right Leadership

## Our Executive Team has a Successful History in Nevada Operations

**Ewan Downie**  
**Chief Executive Officer**

25+ years exploration & mine operation experience. Formerly, President & CEO Premier Gold Mines & Wolfden Resources. Recipient of the PDAC, Bill Dennis Prospector of The Year.

**Matt Gili**  
**President & Chief Operating Officer**

30+ years operational & leadership experience. Formerly Executive General Manager – Cortez District, Nevada. Previously Chief Technical Officer for Barrick Gold Corporation.

**Matt Gollat**  
**Executive Vice President Business & Corporate Development**

14+ years experience in the public minerals and mining industry. Formerly VP Business Development Premier Gold Mines. Director, NOMAD Royalty until its sale in August 2022.

**Ryan Snow**  
**Chief Financial Officer**

15+ years financial management experience in Canada & USA. Formerly Vice-President of Finance for Nevada Copper. Formerly Vice-President, Finance and Controller for Tahoe Resources.

**Andy Cole**  
**Senior Mining & Processing Advisor**

30+ years of experience in mine development, processing and production. Formerly General Manager of Goldstrike – Nevada's largest mining facility.

**Brent Kristof**  
**Senior Technical Advisor**

40+ years global operational and leadership experience. Formerly EVP Projects & Evaluations for i-80 Gold, EVP Operations Premier Gold Mines, COO Klondex Mines, GM Turquoise Ridge, Midas, Deep Post Mines in Nevada.

# Excellent Resources

i-80 Gold is well-positioned in Nevada to develop multiple mining operations and processing facilities.

## A Modern Hub & Spoke

The processing facility at the Lone Tree Complex will serve as a central processing destination for i-80's resources, allowing significant economic return and reduced environmental footprint.

# Our Core Values

i-80's goal is to build a self-sustaining, mid-tier mining company with a peer-best growth platform by employing a methodical, capital-disciplined and staged approach to minimize risk while also assessing and monitoring for accretive growth opportunities.

## Authentic

We are genuine, engaged, and dedicated to achieving goals in a safe, strategic, and sustainable manner

## Tenacious

We overcome obstacles, follow-through on our commitments, take pride in our work, and live our culture

## Inclusive

We are professionals who believe in growth, inclusion, and diversity

## Capable

We promote teamwork and open communications to inspire all stakeholders

# ESG is in our DNA

i-80 Gold is committed to sustainable development and environmental stewardship during exploration and extraction of mineral resources. As we continue to grow our team and our operations, we prioritize safety and improving the social, economic, and environmental wellbeing of our partner communities.

<b>Community &amp; Stakeholder Engagement</b>	<b>Health &amp; Safety</b>
i-80 Gold is committed to building and maintaining respectful, long-lasting, and collaborative relationships with indigenous groups, host communities, local governments, and institutions surrounding our mining operations.	i-80 Gold believes there is no greater respect that we can show for each other than concern for our health and safety, both on and off the job. Every person will know that we care because of our actions. i-80 Gold is constantly working to improve our protocols and strengthen our commitment to a positive safety culture.
<b>Energy, Water &amp; Environment</b>	<b>Diversity &amp; Inclusion</b>
i-80 Gold understands the importance our stakeholders and agricultural neighbors place on water management and conservation- we pledge to be responsible stewards of our environment and resources.	i-80 Gold is comprised of a team of highly talented and diverse individuals. i-80 Gold believes in creating an inclusive culture of respect and equity and strives to attract and retain the brightest minds in the industry.
<b>Local Economic Impact &amp; Procurement</b>	<b>Education &amp; Workforce Development</b>
i-80 Gold's mining operations create economic value in Nevada through job creation, local buying, paying taxes, and investing in the communities we live and work in.	From highlighting the minerals being produced for our sustainable future to promoting the career opportunities that exist within the industry, i-80 Gold is actively engaged in dispelling industry myths and communicating the importance of modern mining.

Pictured: Anson Wong

# BEYOND STEWARDSHIP

Pictured: Jerry Davenport

i-80's commitment to conserving the land, air, and water we interact with is foundational to our work.

**i-80 Gold is currently addressing \$126 million in reclamation and closure obligations to meet both state and federal requirements at all four sites.**

# Safeguarding Water Quality

By reinvesting in Nevada's historic mining properties, i-80 has acquired legacy pit lakes at Lone Tree, McCoy Cove, and Granite Creek. Along with them, we have taken on the commitment to the long-term health and care of the precious waters.

## Pit Lake Monitoring Program

i-80 Gold is involved in a detailed pit lake water monitoring program in collaboration with NDEP-BMRR to develop best management practices. Our team regularly conducts field monitoring and sample collection for analysis to ensure compliance with the state of Nevada water quality standards. From pH values to elevation and temperature, the chemistry of the water in the pit lakes are maintained per Nevada regulations and submitted in quarterly reports.

### General Monitoring

### Water Column Monitoring

### Surface Sampling

### Depth Samples

### i-80 operates in partnership with Nevada Division of Environmental Protection – Bureau of Mining Regulation and Reclamation

With the acquisition of the four operations: Ruby Hill, McCoy Cove, Lone Tree, and Granite Creek, the team at i-80 Gold has a focused responsibility on water management, particularly associated with recharging groundwater basin aquifers back to the source.

# Leading the way on Reclamation

i-80 Gold's primary objectives for post-mining reclamation are to ensure public safety, reduce or eliminate potential environmental impacts, and return the site to a condition that will support land uses similar to those which existed prior to the onset of mining activities.

## Lone Tree Tailings Impoundment

i-80 Gold has worked with industry experts to perform a gap assessment on the Lone Tree tailings impoundment. The gap assessment was benchmarked to the Global Industry Standard on Tailings Management (GISTM). The finalized Lone Tree tailing impoundment gap assessment will be used to determine what GISTM principals need to be evaluated.

Actions identified from the tailings impoundment gap assessment per the GISTM for the Lone Tree site include:

- Design impoundments for climate change
- Review recent tailings management technologies
- Implement emergency action plan
- Determine and mitigate credible failure modes
- Design for final closure

## i-80's Quick Response to Challenges

i-80 Gold is proud to report no major environmental incidents. There was one reportable process solution release. A header pipe on the heap leach pad at Ruby Hill failed, resulting in approximately 1,700 gallons of Barren Solution escaping the lined containment. Our team immediately identified the issue and took action to mitigate the off-containment initial release impacts to the environment and followed up with clean-up activities. These included excavation of impacted soil and corrective actions within the lined heap leach pad channel to ensure this type of incident will not recur. Post excavation laboratory analyzed soil samples confirmed the impacted area was successfully remediated with no adverse impacts to the environment.

# Minimizing our Long Term Impacts

## Scrutinizing Emissions as We Grow:

Given that i-80 does not operate a mill or large scale equipment, it's easy for the company to crow about its low greenhouse gas emissions (15,415 metric tons) – just 8% of what you'd expect from a typical mining operation this size. But as we grow and bring more facilities online, the company remains committed to minimizing emissions and protecting the air we all breathe. This means working with suppliers to ensure we are meeting and exceeding government and the International Council on Mining and Metals (ICMM) Principles, every step of the way.

## Turning E-Waste into a Renewable Resource

i-80 has partnered with ComputerCorps, a 501(c)(3) nonprofit organization based in Nevada's capital, Carson City, to find new life for discarded computers, monitors, keyboards, networking equipment, and peripherals that were no longer useful to the company. i-80's old equipment now provides underserved families with access to computers and training while eliminating e-waste in our local landfills. To date, this partnership has allowed us to prevent two pallets of monitors, more than 30 computers, multiple phones and peripherals from ending up as waste while providing opportunities to dozens of families.

# PARTNERING FOR SUCCESS

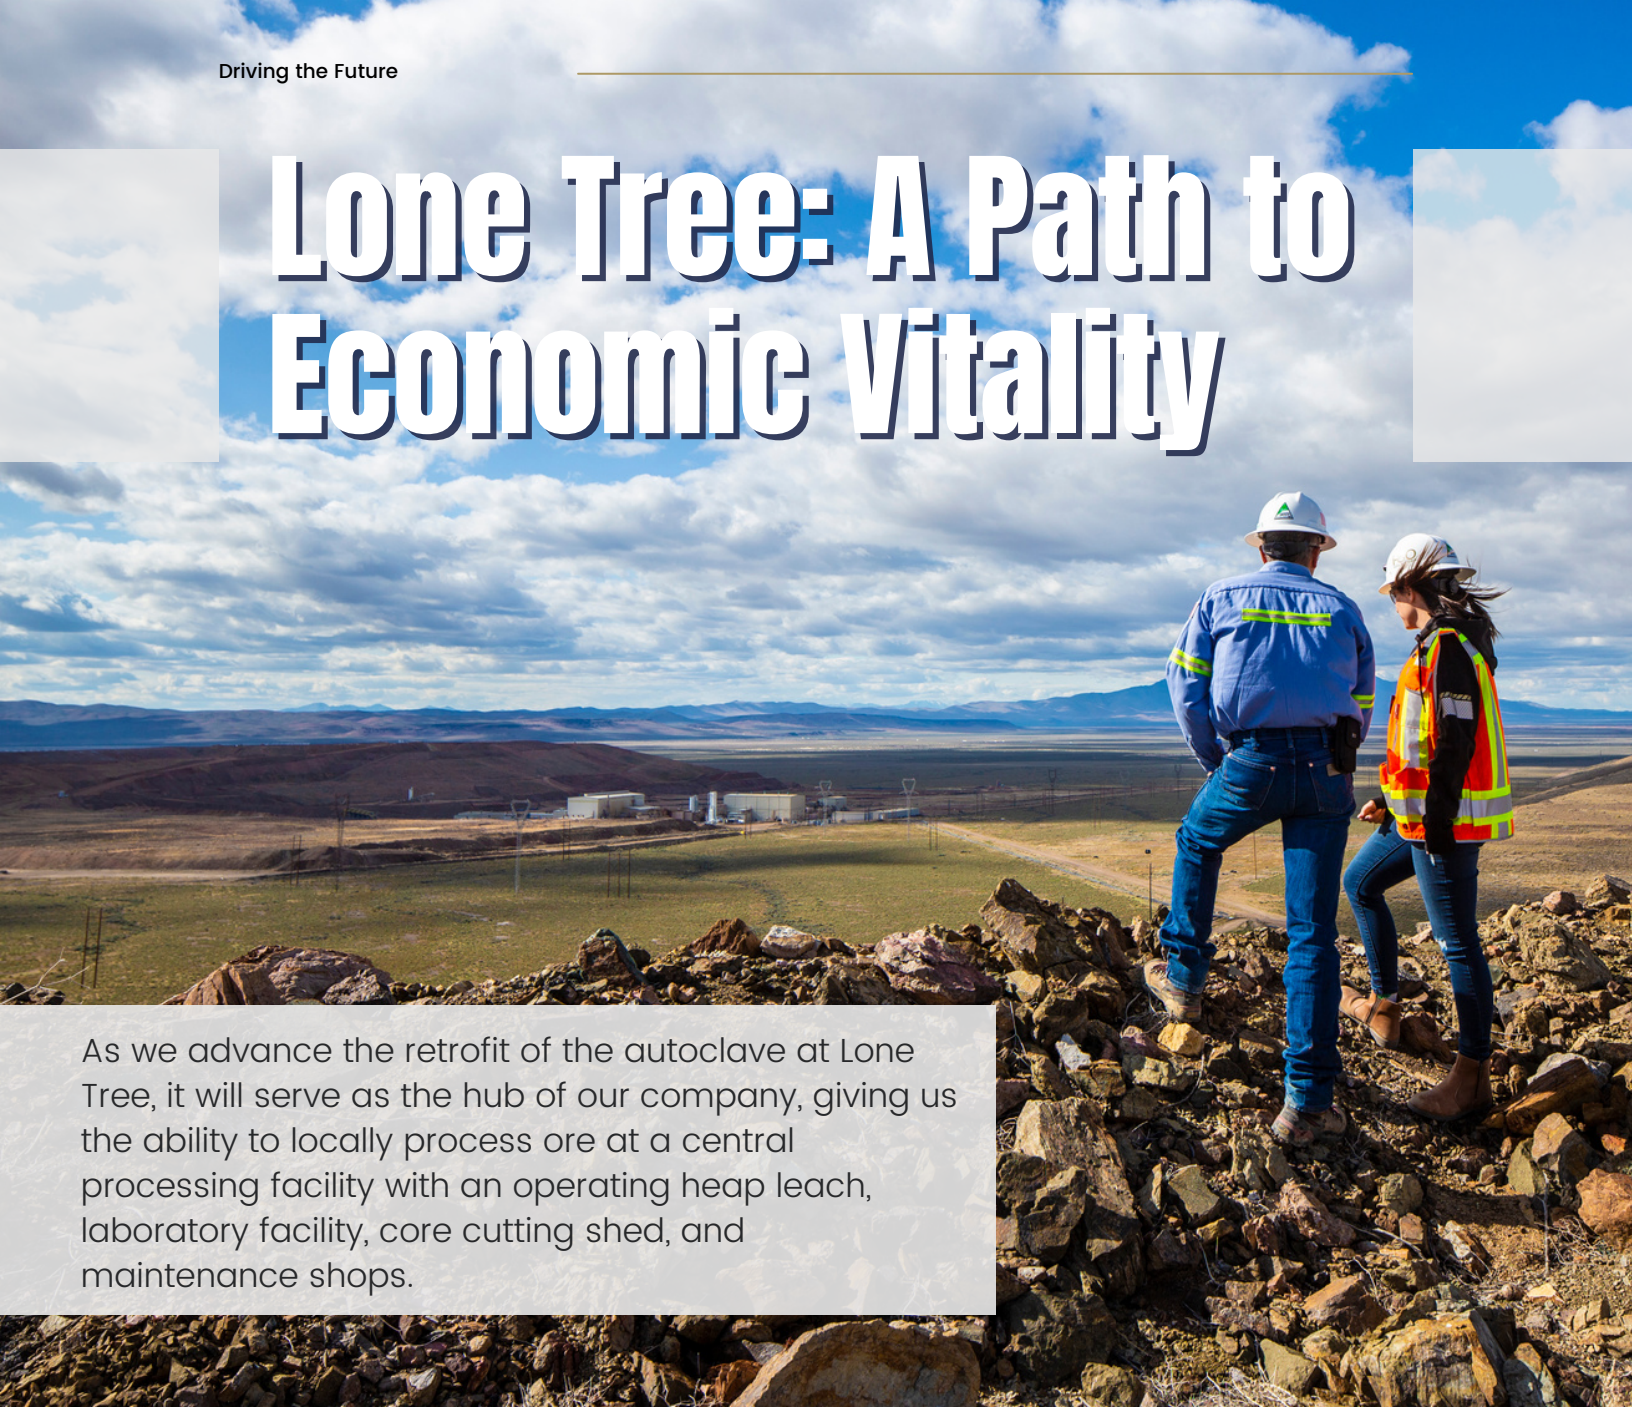

Pictured: John Hebert and Tony Carroll

i-80's investments yield dividends for our communities and power sustainable growth for the company.

**The total land package of the Lone Tree property consists of approximately 12,000 acres with excellent exploration upside.**

# Lone Tree: A Path to Economic Vitality

As we advance the retrofit of the autoclave at Lone Tree, it will serve as the hub of our company, giving us the ability to locally process ore at a central processing facility with an operating heap leach, laboratory facility, core cutting shed, and maintenance shops.

## Engineering Feasibility Study Yields Promising Results to Restart Lone Tree's Dormant Autoclave

i-80 acquired the Lone Tree Facility, all its resources, and critically: one of the only three autoclave facilities in Nevada. We then partnered with Hatch, one of the world's leading engineering firms, to conduct a detailed multi-disciplined pre-feasibility study (PFS) of the Lone Tree Autoclave Facility in September 2022. The team also updated the Capital Expense estimate with several key tradeoff studies focused on optimizing capital, improving safety and operability, and reducing operating costs.

The Class III Costing Study has commenced and is tentatively scheduled for completion in 2023. When this project is completed, it will be the hub of i-80's Nevada operations, central to operations and processing for mines across the State.

## Economic Forecast

In addition to being a boon for i-80 Gold's long term Nevada strategy, this project will invest tens of millions of dollars into our local communities. This will yield jobs and spending for the benefit of our local community.

March 2023

Pictured left to right: Mike Woodland, Brooke Elquist, Mine Engineer Intern Alex Robles, Tom Sullivan, Geology Intern Hayden Kombrink, and Accounting Intern Alec Hammonds

# Our Team: Our Most Precious Investment

## "3 Ships" Internship Program Grows the Next Generation of Mining Leaders

The i-80 Gold 3 Ships Program focuses on three "ships:" Internship, Mentorship, and Leadership. Each of these "ships" is designed to engage the next generation of miners during their educational journey by preparing students for success and providing a meaningful work experience. Our interns worked at a mine site or in the corporate office to develop invaluable professional relationships across the industry during the 10-week paid program.

**\$ 2.1 Million**  
Taxes Paid

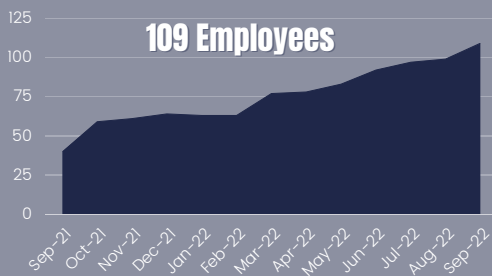

### Supporting the Community

From Sept. 2021 to Sept. 2022, i-80 Gold supported our host communities with nearly \$2.1 million in taxes.

### Growing Outside Business and Talent

i-80's spend on outside services supports jobs in our host communities and across the mining industry.

**\$101.6**  
Million Spent on Outside Services

### 300% Growth

In September 2021, i-80 had 40 employees. Today, our number is more than triple that size. The central location of our operations, an experienced and well-connected leadership team, and exciting new projects continue to attract interest from stakeholders, investors, and industry members.

### Attracting Top Talent

Nevada is home to some of the largest hard rock mines in the world. In order to attract top talent and invest in a long-term workforce, i-80 focuses on offering competitive wages, excellent benefits, and creating a company culture that employees are proud to be a part of.

**\$10.6 million**  
2021-2022  
wages + benefits

# EMPOWERING PEOPLE

Pictured: Shelly Heilman and Maria Painter

From employees to our communities, from suppliers to schoolchildren, i-80 invests in leadership for the future.

**Our community partnerships support our efforts to recruit talent, diversify the workforce, and educate the next generation about the role mining plays in our daily lives.**

# Safety: Our Most Critical Commitment

## Nevada Mine Rescue Alliance

i-80 Gold partnered with Small Mine Development (SMD) and Hecla Mining Company to serve the mining operations in our geographic footprint by providing underground mine rescue support. Our team trains regularly and refines their skills to ensure they are always prepared to respond when called on.

## i-80's team wins big at the Nevada Mining Association Safety Awards

**Safety Champion** – Our company commitment to safety begins at the front line. Dillon Pollock's scope of work goes beyond the responsibilities that are expected of an electrician. He inspects and audits all of Ruby Hill's fall protection equipment. Dillon makes sure that his co-workers stay safe. He coaches his co-workers and is a major contributor at our safety meetings and was recognized as a safety champion by the Nevada Mining Association (NVMA).

**Cammie Holland** – At the supervisory level, NVMA honored Cammie's work overseeing and supporting a group at the Lone Tree lab. Her team has maintained a Total Reportable Injury Frequency Rate of 0.00 since at least 2015. Her high standards for safety, valuable knowledge in site processing, along with outstanding safety leadership has allowed the transition to new ownership to be a safe one.

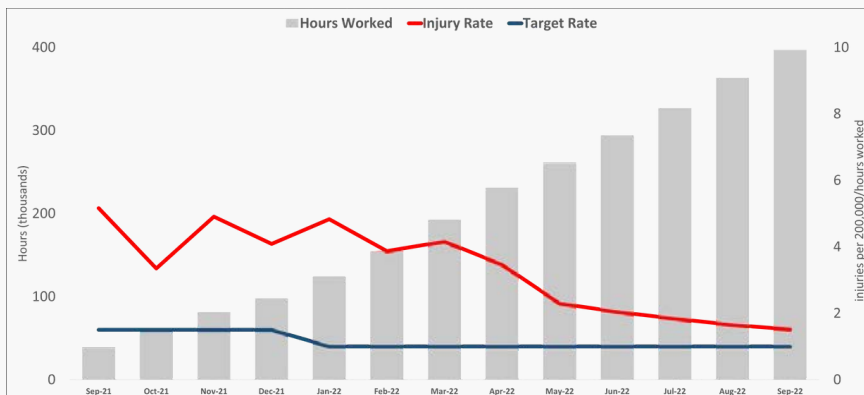

Pictured left to right: Jon Laird, Cammie Holland, Sheldon Wilson, Victor Ortiz, and Ramiro Zamago

# Working To Prevent All Injuries

At i-80 Gold Corp, we believe the implementation of a Health and Safety Management System (HSMS) is at the core of our business. It is driven by our health and safety vision- that there is no greater respect we can show for each other than concern for our health and safety. Developing a leading class HSMS requires leadership at all levels of our organization. We believe:

**Safety is integral to our operations.**  
**Everyone is responsible for safety.**  
**All injuries can be prevented.**

**Focusing on the Data: i-80's Safety Record is the Key to Continued Success**

**0**  
**Fatalities**  
**ZERO**

**3,536 Hours**

Dedicated to training for our small, 104-person team in 2021- 2022. All employees undergo comprehensive training when they begin work at i-80 Gold and each meeting begins with a team "Safety Share."

Pictured: Heather Veasey

# Earning Local Support

"Community buy-in" takes many shapes and forms across the industry, but at i-80, we invest the Nevada way: investing in our communities and finding transparent and clear ways to ensure our neighbors know what we are working on.

## Merging Company Values With Community Needs

i-80 Gold is committed to positively impacting the communities we live and work in by contributing our time, talent, and treasure. Priority is given to organizations that foster growth and development within the Nevada communities we support. The Community Relations Review Committee approves requests based on the community outreach initiatives.

**\$53,000**

in direct support for  
community groups and local  
charities

### Education & Workforce Development

We invest and provide educational and career opportunities to students and community members.

### Long-term Investment

We positively impact the communities we live and work in by contributing to economic development and driving social impact.

### Collaborative Conservation

We build and maintain respectful, long-lasting, and collaborative relationships with host communities, all while being responsible stewards of our environment and resources.

### Keeping The Lines Open

Open, continuous outreach and communication is critical to i-80's success.

### Town Hall Meetings

Hosted 5 meetings in Winnemucca, Battle Mountain, and Eureka

### Corporate Office Open House & Blood Drive

Invited community members and vendors to tour the Reno office and donate blood

### Community Mine Tours & Family Day

Ruby Hill, Lone Tree, and Granite Creek opened their operations for site tours

# Committed to STEM Education

**\$23K**

Contributed

## Advancing Women in STEM

Girl Scouts of Sierra Nevada, Nevada Outdoors Nature in My World Program, Nevada Mining Association Teacher Earth Science Workshops, Mackay Muckers, and the University of Nevada, Reno STEM Sisters Program all received contributions towards their educational initiatives.

## Ensuring our Contributions Make a Difference

From working with the University of Nevada, Reno and Great Basin College to create the Mining Center of Excellence, to encouraging Girl Scouts at every level to earn the "Mining in Today's World" patch, i-80 Gold is invested in celebrating mining and all the potential it holds for the next generation. Nothing conveys our work better than being able to showcase it first hand through mine tours and access to our knowledgeable workforce. We are proud to facilitate tours with groups to enable them to see, touch, and ask questions about what modern day mining really is.

Pictured: Sheryl Gibson and Cammie Holland with students

## Lowry High School Education Committee - serving the students of Winnemucca

In partnership with other mining companies in Nevada, i-80 Gold serves on the Lowry High School Education Committee. This committee interacts with students in Winnemucca, Nevada throughout the year to educate them about career opportunities and paths within the mining industry.

Each grade level, freshmen through seniors, have a dedicated day of activities that provides the chance to expand their knowledge of mining.

# A 21st Century Workforce

At i-80 Gold, we strive for equity by creating a culture of inclusion and diversity. We want to attract and retain the brightest minds and ensure all our employees are able to reach their full potential and have the same ability to succeed, regardless of their background.

i-80 leads Nevada's mining industry in gender representation

Women Comprise  
**34%**  
Of Our Workforce

i-80 Gold is committed to hiring professionals who demonstrate values that foster an environment of inclusion and diversity. Our team drives inclusion by consistently creating a workplace where all employees can contribute at their highest levels. i-80 is proud to be home to a higher percentage of women miners than anywhere else in the industry and will continue to promote, develop, and encourage women in the mining industry.

## Celebrating International Women in Mining Day

We celebrated the skilled and diverse women working with us at i-80 Gold Corp. on International Day of Women in Mining. This campaign also aims to call on industry and individuals to collectively and collaboratively work on actionable initiatives that will lead to a more sustainable, diverse and inclusive mining industry.

**The opportunities for me to make mining safer and more efficient continue to grow every day.**

Jennelle Hanson,  
(Pictured top left) Director of Information Technology

# Engaging Transparently

The cornerstone of our engagement with our host communities, our team, and our government partners is transparency. Engaging transparently is critical to our ability to maintain our license to operate.

## Creating a Straightforward Way to Address Community Concerns and Resolve Challenges

i-80 Gold launched a Community Grievance Mechanism in the spring of 2022 to address concerns, questions, and complaints by stakeholders, individuals, and communities associated with i-80 Gold's operations and initiatives. We strive to conduct our operations in a way that limits any disruption to our neighboring communities and our goal is to provide assurance that concerns will be heard and addressed in a timely manner to develop a solution. The Grievance Mechanism tracks grievances from transmittal to resolution. There were no grievances received in the past year.

Links to this tool are included on all community-facing communications ([i80gold.com/grievance](https://i80gold.com/grievance)).

# Forward-Looking Statements

## Cautionary Statement Regarding Forward Looking Information

Certain statements in this presentation constitute "forward looking statements" or "forward looking information" within the meaning of applicable securities laws, including but not limited to, the Company's objectives relating to ESG strategies, policies, commitments to deliver leading industry practices in Nevada, safety, and improving the social, economic, and environmental wellbeing of its partner communities, the completion of refurbishment and development activities at the Lone Tree project, commencement of mining operations at the Lone Tree project (including Buffalo Mountain), Granite Creek project, the Ruby Hill mine and the McCoy-Cove project, mineral resource and reserve estimates and exploration and development potential, refractory processing capabilities and production targets. Such statements and information involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the company, its projects, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward looking statements or information. Such statements can be identified by the use of words such as "may", "would", "could", "will", "intend", "expect", "believe", "plan", "anticipate", "estimate", "scheduled", "forecast", "and other similar terminology, or state that certain actions, events or results " may", "could", " would", "or " be taken, occur or be achieved. These statements reflect the Company's current expectations regarding future events, performance and results and speak only as of the date of this presentation. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise except as required by applicable law.

Forward looking statements and information involve significant risks and uncertainties, should not be read as guarantees of future performance or results and will not necessarily be accurate indicators of whether or not such results will be achieved. A number of factors could cause actual results to differ materially from the results discussed in the forward looking statements or information, including, but not limited to failure to satisfy of the relevant conditions to the completion of the transactions described herein, failure to obtain the relevant regulatory approvals, material adverse changes, exercise of termination rights by any relevant party, unexpected changes in laws, rules or regulations, or their enforcement by applicable authorities the failure of parties to contracts with the Company to perform as agreed social or labour unrest changes in commodity prices and the failure of exploration, refurbishment, development or mining programs or studies to deliver anticipated results or results that would justify and support continued exploration, studies, development or operations. Readers of this presentation are encouraged to read the "Risk Factors" as more fully described in the Company's filings with the Canadian Securities Administrators and the U.S. Securities and Exchange Commission, including its Annual Information Form available on SEDAR at [www.sedar.com](http://www.sedar.com) and on the SEC's website at [www.sec.gov](http://www.sec.gov).

## Cautionary Note to US Investors Concerning Estimates of Resources

This presentation uses the term "inferred resources." "Inferred resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. Under Canadian rules, estimates of inferred mineral resources may not form the basis of a feasibility study or prefeasibility study, except in rare cases. Information contained in the presentation containing descriptions of any mineral deposits may not be comparable to similar information made public by U S companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder that disclose mineral reserves and mineral resources the SEC's new mining disclosure rules in Regulation S-K Subpart 1300 ("S-K 1300"). Under S-K 1300 reserve and resource definitions are substantially similar to the corresponding CIM Definition Standards however, there are differences between NI 43-101 and S-K 1300 and therefore information contained in the presentation may not be comparable to similar information made public by public U S companies pursuant to the Regulation S-K 1300.

## National Instrument 43-101 Standards of Disclosure for Mineral Projects.

Unless otherwise indicated, i-80 has prepared the technical information in this presentation ("Technical Information") based on information contained in the technical reports (collectively the "Technical Reports") concerning the Ruby Hill project, the Lone Tree project, the McCoy Cove project and the Granite Creek project available under i-80's profile on SEDAR at [www.sedar.com](http://www.sedar.com). Each Technical Report was prepared by or under the supervision of a qualified person (a "Qualified Person") as defined in National Instrument 43-101 Standards of Disclosure for Mineral Projects of the Canadian Securities Administrators ("NI 43-101"). For readers to fully understand the information in this presentation, they should read the Technical Reports in their entirety, including all qualifications, assumptions and exclusions that related to the information set out in this presentation which qualifies the Technical Information. Readers are advised that mineral resources that are not mineral reserves do not have demonstrated economic viability. The Technical Reports are each intended to be read as a whole, and sections should not be read or relied upon out of context. The Technical Information is subject to the assumptions and qualifications contained in the Technical Reports. All maps and diagrams are for illustrative purposes only and not to scale.
