**Position:** **Engineering & Construction Manager**

i-80 Gold Corp is seeking a candidate to fill the position of Engineering & Construction Manager. The Engineering & Construction Manager will oversee and manage all engineering and construction activities within the project. This role requires a strong leader with extensive experience in project management, engineering, and construction within the mining industry. The successful candidate will ensure that all projects are completed on time, within budget, and to the highest safety and quality standards.

**Location:** Lone Tree Property near Battle Mountain, NV

---

**Key Responsibilities:**

- Manage the engineering and construction (contractors as well as owners' team self-work) to ensure the successful delivery of the project.
- Develop and implement detailed execution plans, schedules, and work breakdown structures for approved projects.
- Implement project controls, cost management, and progress tracking systems.
- Coordinate with other departments and stakeholders to ensure project alignment and integration.
- Oversee the design and construction of mining infrastructure, including roads, processing plants, and other facilities, Greenfields and Brownfield.
- Ensure compliance with all safety, environmental, and regulatory requirements.
- Monitor project progress, and performance, implement corrective actions as needed.
- Manage project risks and develop mitigation strategies.
- Monitor key performance indicators (KPIs) and drive actions for cost management, productivity improvement, and safety enhancement.
- Prepare project reports and present in review meetings, milestone evaluations, and progress reporting to senior management and stakeholders.
- Foster a culture of continuous improvement and innovation within the engineering and construction teams.
- Other duties as assigned.

**Qualifications:**

- Bachelor's degree in engineering, Construction Management, or a related field. A master's degree preferred.
- Minimum of 12 years of experience in engineering and construction management within the mining industry.
- Proven history of successfully managing large-scale mining projects.
- Strong knowledge of engineering principles, design and construction methods common to engineering works, including civil, structural, mechanical, and electrical works, and construction practices in the mining environment.
- Excellent leadership, communication, and interpersonal skills.
- Ability to work effectively in a fast-paced and dynamic environment.
- Proficiency in project management software and tools.
- Strong problem-solving and decision-making abilities.
