

About Us:

At i-80 Gold, we are committed to establishing Nevada's next leading mid-tier gold producer, underpinned by exceptional performance and a people-centered culture where every employee can contribute meaningfully. Our development plan encompasses five gold projects, including both open pit and underground mines—supported by three processing streams: the refurbishment of an autoclave processing facility, construction of a CIL plant, and a large-scale heap leach facility. This environment presents a valuable opportunity to expand your skillset and advance your career. For more information about i-80 Gold please visit our website: www.i80gold.com.

Who are we?

Join us during this period of rapid growth within a collaborative, small team setting with a flat organizational structure, guided by our core values: **care, integrity, respect, collaboration, and excellence.**

Position: Water Treatment Plant Supervisor

i-80 Gold Corp is seeking a motivated and proactive individual to fill the position of **Water Treatment Plant Supervisor** for our Granite Creek site. This person selected for the position will be responsible for process operations and maintenance, on a daily basis, as well as other duties and small project oversight that may arise through the normal course of business.

Location: Granite Creek Mine, 6750 Getchell Mine Rd, Golconda Nevada, 89414

Responsibilities:

- Demonstrate a personal commitment to safety.
- Coordinate water treatment plant pm schedule.
- Seek to minimize costs through process improvements.
- Supervise and lead safety, environmental, security, community, MSHA and other regulatory requirements for the Granite Creek operation, supported by i-80 and external subject matter experts.
- Development of our people and helping them to earn opportunities.
- Ensure standards are established, communicated, and maintained through training, observation, coaching and accountability.
- Maintain transparent communications to all levels of the organization.
- Supervise site employees and ensure that contractors, consultants, and all other visitors are oriented and can work safely and efficiently.
- Know and understand how this role supports safety, environmental, production, and financial targets. Ensure that targets set for self and team are met.
- Actively pursue improvement in every aspect of our business.
- Other duties as assigned.

Qualifications

- High School Diploma or GED
- Demonstrated success in water treatment plant processing experience, and mine dewatering including a minimum of 3+ years in direct supervisory and leadership roles
- Underground dewatering experience preferred
- Experienced in supervising operation and maintenance

- Must have worked with regulatory and other government entities for mining (e.g., MSHA, BLM, NDEP, County, City/Town, etc.)
- Ideal candidate will be interested in growing their career with a junior mining company focused in growing by exploring, developing projects, and operating mines
- Competent in the use of Microsoft Office software, particularly Excel, Word, and PowerPoint
- Experienced with large scale mine water management systems
- Ability to analyze and apply continuous improvement to all aspects of dewatering and water treatment.

How to Apply:

Please refer to the Careers page on our website for instructions on how to apply. We thank you for your interest. Only those selected for an interview will be contacted.
